Partners

Our current partners represent the largest associations of the industry:

UMTS Forum helps the broadband market players to understand and learn how to use 3G/UMTS network options as well as to trace its long evolution. UMTS Forum is actively involved in ITU activity. Regularly it contributes to EC and CEPT activities and promotes development of strong relationships with other governmental, administrative, industrial and technology organisations.

HTA

NTA activity is aimed to develop telecom market by removing administrative barriers, to influence the rules and regulations and other legal acts, regulating organisational and operative activities of telecommunication companies.

Association of market participants of wireless data communication networks (Wireless Ukraine) is an industrial organisation, promoting Ukraine wireless market development. Today Wireless Ukraine contains more than 90 organisations, including large multinational companies, the largest national telecommunication operators and system integrators, rapidly growing regional operators and public institutions.

GSA represents the leading global GSM/3G suppliers, accumulating more than 80% of the global GSM/3G market share. GSA provides a recognised, realistic and objective information for the mobile industry including market intelligence reports, market/technological changes and the latest statistics. GSA advises public authorities, ministries and politicians about the appropriate conditions for mobile market development.
